*** Alt / Meta keys:** Apple Terminal sends Alt shortcuts only when *Settings › Profiles › Pro › Keyboard › Use Option as Meta key* is checked. It is currently off.

**** Neovim ↔ tmux:** in a pane running Neovim, `Ctrl+h/j/k/l` is passed to Neovim and moves only between Neovim splits. Use P `h/j/k/l` to jump out to a tmux pane, or add the `vim-tmux-navigator` Neovim plugin for seamless movement.
